

Theoretische Informatik 1

Übung Blatt 13

Aufgabe 13.1

a

$$G = (\{S, A, B, C, D, E, F\}, \{a, b, c\}, P, S)$$

$$P = \begin{array}{l} \{S \rightarrow aaAac \mid cbBb \mid \epsilon, \\ A \rightarrow SF \mid C \mid aab, \\ B \rightarrow aB \mid Bbba \mid BD \mid cbE, \\ C \rightarrow \epsilon \mid S, \\ D \rightarrow a \mid Ebc, \\ E \rightarrow b \mid Bb \mid BC, \\ F \rightarrow ACA \mid CccE\} \end{array}$$

1) ϵ -Übergänge eliminieren:

$$P = \begin{array}{l} \{S \rightarrow aaAac \mid cbBb \mid aaac, \\ A \rightarrow SF \mid C \mid aab \mid F, \\ B \rightarrow aB \mid Bbba \mid BD \mid cbE, \\ C \rightarrow S, \\ D \rightarrow a \mid Ebc, \\ E \rightarrow b \mid Bb \mid BC \mid B, \\ F \rightarrow A \mid C \mid AC \mid CA \mid AA \mid ACA \mid CccE \mid ccE\} \end{array}$$

2) Einheitproduktionen eliminieren:

Einheitsproduktionen:

(A,F),(A,C),(C,S),(A,S),(E,B),(F,A),(F,C),(F,S)

$$P = \begin{array}{l} \{S \rightarrow aaAac \mid cbBb \mid aaac, \\ A \rightarrow SF \mid AC \mid CA \mid AA \mid ACA \mid CccE \mid ccE \mid aab \mid aaAac \mid cbBb \mid aaac, \\ B \rightarrow aB \mid Bbba \mid BD \mid cbE, \\ C \rightarrow aaAac \mid cbBb \mid aaac, \\ D \rightarrow a \mid Ebc, \\ E \rightarrow b \mid Bb \mid BC \mid aB \mid Bbba \mid BD \mid cbE, \\ F \rightarrow SF \mid aab \mid aaAac \mid cbBb \mid aaac \mid AC \mid CA \mid AA \mid ACA \mid CccE \mid ccE\} \end{array}$$

4) Terminale auflösen:

$$P = \begin{array}{l} \{S \rightarrow X_a X_a A X_a c \mid c X_b B X_b \mid X_a X_a X_a c, \\ A \rightarrow SF \mid AC \mid CA \mid AA \mid ACA \mid CccE \mid ccE \mid X_a X_a X_b \mid X_a X_a A X_a c \mid c X_b B X_b \mid X_a X_a X_a c, \\ B \rightarrow X_a B \mid B X_b X_b X_a \mid BD \mid c X_b E, \\ C \rightarrow X_a X_a A X_a c \mid c X_b B X_b \mid X_a X_a X_a c, \\ D \rightarrow X_a \mid E X_b c, \\ E \rightarrow X_b \mid B X_b \mid BC \mid X_a B \mid B X_b X_b X_a \mid BD \mid c X_b E, \\ F \rightarrow SF \mid X_a X_a X_b \mid X_a X_a A X_a c \mid c X_b B X_b \mid X_a X_a X_a c \mid AC \mid CA \mid AA \mid ACA \mid CccE \mid ccE, \\ X_a \rightarrow a, \\ X_b \rightarrow b\} \end{array}$$
